

BLUE RIVER RESOURCES ANNOUNCES EXPLORATION PLANS FOR THE CASTLE COPPER PROJECT

October 28 2021

VANCOUVER, BC. Blue River Resources Ltd. (TSXV: BXR) (OTC:BRVRF) (Frankfurt:OBL) ("Blue River" or the "Company") is pleased to announce exploration plans for the Castle Copper Property, located approximately 20 km south of Kodiak Copper's MPD discovery.

The area adjoining the Property to the south (Rats showing) was previously explored by Blue River, last in 2014. The Rats showing is associated with the contact between the Nicola Group volcanic rocks and the Summer Creek Pluton.

In 2010, some magnetometer and VLF surveys, along with a minor soil geochemical survey, were carried out in the southern portion of the current project area.

The Company has recently completed an orientation soil sampling program over a portion of the contact zone in the southern portion of the property. A ground IP survey is also being planned to cover portions of the property.

ABOUT BLUE RIVER RESOURCES LTD

Blue River Resources Ltd. is a mineral exploration and development company, focused on copper exploration in North and South America. The Company has a 100% interest in the Castle Copper Project near the Copper Mountain Mine, Princeton, BC.

Neither TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this release.

ON BEHALF OF THE BOARD
